**DPHSS Guidance Memorandum 2020-11 Rev15**

**RE: Additional Guidance Relative to Executive Order No. 2022-09**

This guidance document rescinds all previously issued Department of Public Health and Social Services (DPHSS) guidance memoranda relative to Government of Guam travel quarantine restrictions. In accordance with Executive Order No. 2022-09 all travelers entering Guam, by air or sea, will not be subject to quarantine, and DPHSS will cease processing of passengers and airline crew members.

Travelers arriving into the United States from any foreign country are subject to the Centers for Disease Control and Prevention (CDC) requirements for either obtaining a negative pre-departure COVID-19 test result or presenting documentation of recovery from COVID-19, and for providing proof of COVID-19 vaccination.

Travelers arriving into Guam, by air or sea, should continue to observe the following recommendations:

1. Self-monitor for symptoms of COVID-19, including fever, cough, and shortness of breath, fatigue, body aches, headaches, loss of taste or smell, sore throat, congestion, nausea and/or diarrhea;
2. If symptoms develop you should:
  - a. Stay home, except to seek medical care. Call ahead before visiting the clinic/doctor;
  - b. Get tested if you have symptoms of COVID-19. While waiting for test results, you should self-quarantine at home, stay away from others, including staying apart from those living in your household;
  - c. Seek emergency medical care immediately or call 911 if you are experiencing any of the following warning signs of COVID-19, such as trouble breathing, persistent pain or pressure in the chest, new onset of confusion, inability to wake or stay awake, or bluish lips or face.

This guidance memorandum does not apply to individuals identified as close contacts to persons with COVID-19. Close contacts are subject to quarantine based on applicable Guam law and CDC guidelines, and DPHSS case investigation and contact tracing protocols. Travelers who test positive are subject to DPHSS isolation protocols.
